## PRODUCT CATALOGUE

## About us

With 30 years of experience in production of firearms, HS has grown into one of the leading manufacturers of top-quality small arms with one of the largest production factories in the world. Ever since its foundation, advanced thinking has been the focus of HS manufacturing which was the main factor for the international success of the HS pistol line, developed using latest technological achievements and real combat experience from the Croatian Homeland War.

Following HS pistol line's success, surge of demand for HS products enabled the company to make significant investments in manufacturing facilities, equipment and engineer workforce, making HS one of the manufacturing leaders on the international market.

HS today takes pride in its reputation for delivering innovative, high-performance quality firearms with strong focus on development of technologically advanced and reliable products. Every HS product is developed using years of expertise, ensuring that the final products reflect our commitment to excellence and safety. This is recognised by both experts and end-users who repeatedly award our top-class handguns.

# HS-9 3.0 G2

HS-9 G2 3.0 has everything you need in small, sub-compact package. Featuring hammer forged 3 inch barrel and forged steel slide protected with Melonite finish. Redesign frame contour and grip texture allows higher gripping on the gun resulting in better control during rapid fire. Slide has deeper serrations for easier manipulation especially under stress. Pistol is equipped with fiber optic front sight and low profile rear sight. The sights are serrated to prevent the glare. Other features are picatinny rail, ambidextrous magazine release, grip safety, trigger safety, firing pin safety along with striker-status indicator and loaded chamber indicator. Trigger guard is enlarged for easier trigger manipulation even while wearing gloves. Pistol comes with two types of stainless steel magazines – one is flush with the grip and capacity of 13+1, the other is full-size magazine with grip sleeve and capacity of 16+1. This means that by simply changing the magazine we can transform HS-9 G2 3.0 from concealed carry/back-up option to high capacity full-frame pistol. All these features make HS-9 G2 3.0 extremely versatile weapon.

# HS-9 5.0 G2

HS-9 G2 5.0 offers everything you need for duty-carry, home-defense or even competition. Featuring 5 inch hammer forged barrel with longer slide and full size frame. The longer barrel translate in to muzzle velocity increase, but it also adds more weight up front, which helps reduce muzzle flip and felt recoil, allowing faster follow-up shots. Increased sight radius in combination with fiber optic front sight and low profile rear sight enables faster target acquisition. The sights are serrated to prevent the glare. Redesign frame contours with new grip texture allows higher hand positioning on the gun and better control during rapid fire. Trigger guard is enlarged for easier trigger manipulation while wearing gloves. Other features include picatinny rail, ambidextrous magazine release, grip safety, trigger safety, firing pin safety along with striker-status indicator and loaded chamber indicator. Pistol comes with stainless steel (16+1) magazines.

# HS SF19 3.8

SF19 3.8 packs serious firepower in compact size. Shorter slide/barrel enables easier manipulation while retaining excellent capacity with full size frame. SF19 3.8 features everything we know and love in full size model; fully ambidextrous slide stop lever and magazine catch, three safety system – firing pin safety, grip safety and trigger safety with two indicators – striker status and loaded chamber indicator (both visual and tactile). Other features include arrowed front and back slide serrations for easier manipulation, picatinny rail, aggressive grip texturing, interchangeable backstraps (3 sizes) and enhanced flat trigger with shorter reset. Enlarged trigger guard ensures easier trigger manipulation even while wearing gloves. Pistol comes with stainless steel high capacity magazines (19+1).

SF19 3.8 offers full-size performance in a compact design.

# HS S5 3.3

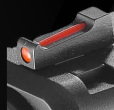

S5 is .45ACP polymer frame, single-stack, striker fired pistol. Featuring 3.3 inch hammer forged barrel and forged slide. Barrel and slide are Melonite treated. Slide has pronounced serrations for easier manipulation and is equipped with fiber optic front sight and tack-rack rear sight. The sights are serrated to prevent the glare. Grip is slimmer with rounded trigger guard and extended beaver-tail for higher hand positioning and better recoil control. All surfaces on gun are rounded to produce "no-snap" effect. Other features are three safeties – grip safety, trigger safety and firing pin safety along with loaded chamber indicator. Magazine release is fully ambidextrous. S5 comes with two types of stainless steel magazine – one is flush with grip and capacity of 5+1, the other is with grip extension and capacity of 6+1. S5 provides excellent firepower of .45 ACP round in slim, highly concealable design.

## HS ECHELON 4.5

The Echelon™ sets a new standard for modern, striker-fired duty pistols. With a host of patent-pending features, this modular and highly adaptable handgun is designed around a robust stainless steel chassis and revolutionary optics mounting system. Engineered with superior ergonomics and built to withstand the harshest conditions, the Echelon takes its rightful place at the front of the pack. At the heart of the Echelon lies the all-new Central Operating Group. Employing cutting edge manufacturing techniques, the Central Operating Group is entirely self-contained and serialized allowing it to be easily moved between grip modules in seconds. Precision built from stainless steel, the chassis provides a robust housing for its patent-pending operating system. Concealed beneath the slide cover plate is the Echelon's patent-pending optic mounting system. The Variable Interface System allows users to mount over 30 optics directly to the slide without the use of adapter plates. The Echelon employs a newly developed magazine for rugged durability, hard use, and reliable operation. Blacked out in a scratch and wear-resistant coating, the magazine offers a 9mm capacity of 17+1 or 20+1.

Caliber (mm)	9X19
Weight without magazine (g)	666
Weight of empty magazine (g)	85 (17 rd) / 94 (20 rd)
Magazine capacity (rd)	17 / 20
Length (overall) (mm)	203
Barrel length (mm)	114
Height (mm)	140,9
Width (mm)	33,4

## HS ECHELON COMP

The new Echelon Comp features an integral compensator discreetly designed with a single port on the top of the hammer-forged slide and barrel. Redirecting gas upwards, it effectively reduces muzzle rise and enhances control. The result is a pistol that delivers faster and more accurate follow-up shots. In addition, the front sight is positioned behind the compensator for an uninterrupted sight picture. Alternative full-size and compact grip modules give shooters the ability to find a configuration that fits them best. Available in small, medium, and large, each grip module accepts the Central Operating Group and all three backstraps. The Echelon's patent-pending trigger harnesses the advantages of the Central Operating Group to deliver superior performance. Entirely contained within the chassis, critical components are machined from tool steel and highly polished for a clean take up, defined wall, crisp break and short, positive reset. The result is a trigger that redefines expectations. In addition to passing rigorous testing, the Echelon's Central Operating Group features a unique second sear design to help prevent unintentional discharge should the firearm be dropped. Field stripping the Echelon is toolless and requires no pull of the trigger.

## HS ECHELON THREADED BARREL

## HS ECHELON 4.0C

Engineered for carry, the Echelon™ 4.0C retains the key features of the full-size model, with a shorter 4-inch barrel and compact frame for enhanced concealability. Its revolutionary Variable Interface System provides unmatched direct-mount compatibility with today's leading red dot sights, complemented by U-Dot irons for fast target acquisition. At the heart of the Echelon lies the all-new Central Operating Group. Employing cutting edge manufacturing techniques, the Central Operating Group is entirely self-contained and serialized allowing it to be easily moved between grip modules in seconds. Precision built from stainless steel, the chassis provides a robust housing for its patent-pending operating system. Concealed beneath the slide cover plate is the Echelon's patent-pending optic mounting system. The Variable Interface System allows users to mount over 30 optics directly to the slide without the use of adapter plates.

The serialized Central Operating Group is housed in a compact frame, offering a 15-round capacity with the flush magazine and 18 rounds with the extended magazine.

Caliber (mm)	9X19
Weight without magazine (g)	621
Weight of empty magazine (g)	77 (15 rd)
Magazine capacity (rd)	15 / 18
Length (overall) (mm)	187,1
Barrel length (mm)	102
Height (mm)	128,7
Width (mm)	33,4

## HS ECHELON 4.0C THREADED BARREL

Engineered for carry, the threaded Echelon™ 4.0C retains the key features of the full-size model, with a shorter 4.7-inch threaded barrel and compact frame for enhanced concealability. Its revolutionary Variable Interface System provides unmatched direct-mount compatibility with today's leading red dot sights, complemented by tritium three-dot irons for fast target acquisition. The serialized Central Operating Group is housed in a compact frame, offering a 15-round capacity with the flush magazine and 18 rounds with the extended magazine.

# VHS2S SEMI-AUTO

VHS-2S is a fully ambidextrous .223 Rem caliber semi-automatic rifle. Designed on bullpup modular platform with proved short-stroke gas piston operating system it maintains all the ballistic benefits of a longer barrel in a shorter package without sacrificing overall length, accuracy and muzzle velocity. Adjustable gas block works in two modes; suppressed and unsuppressed.

The polymer receiver is equipped with an 5 point adjustable buttstock. The rifle is equipped with NATO STANAG 4694 rail and adjustable flip up iron sights. Front handguard has M-LOK mounting system at the 3, 6, and 9 o'clock positions. Pistol grip is removable and compatible with M4/AR-15 style grips.

Rifle is equipped with ambidextrous dual system of sling attachment; QD socket on front handguard, upper receiver and buttstock with eyelet attachment for sling snap hook on upper receiver and on the buttstock.

VHS2S is compatible with STANAG 4179 magazines. Combination of all of this with dual dust cover ejection ports on both sides of the receiver and specially designed empty case defectors create flexible and user friendly multi-purpose rifle.

Mode of fire	Safe and Semi-Automatic
Caliber (mm)	.223 Rem
Barrel length (mm)	410 (16,1")
Length (overall) (mm)	710
Length (drawn out buttstock) (mm)	760
Width (mm)	76
Height with NATO frame (mm)	222
Weight without magazine (kg)	3,60
Magazine capacity (rd)	10
Trigger pull (N)	25-35

# VHS2S SEMI-AUTO

## Advantages / key features

- Long barrel compared to total length of the rifle (60% of the total length of the rifle is barrel length)
- Barrel thread 1/2"-28 compatible with all M4/AR-15 flash suppressor devices
- Removable pistol grip, compatible with all M4/AR-15 pistol grips
- M-LOK mounting system on front handguard on 3 positions: 3 o'clock, 6 o'clock and 9 o'clock
- Ambidextrous dual system of sling attachment: QD socket on front handguard, upper receiver and on the buttstock
- Eyelet attachment for sling snap hook on upper receiver and on the buttstock
- Long NATO 4694 rail on the upper receiver
- Front mechanical sight: Integrated into NATO 4694 rail on upper receiver, flip-up, elevation adjustable
- Rear mechanical sight: Integrated into NATO 4694 rail on upper receiver, flip-up, windage adjustable, 5-position aperture (range for targets under 100 m up to 500 m)
- Mechanical sights are user adjustable without tools
- Adjustable gas cylinder: "N" for normal mode and "S" for suppressor mode
- Ambidextrous cartridge ejection port (ejection side can be switched without additional parts and tools on user level)
- Trigger shape - straight
- Adjustable buttstock in 5 positions
- Ambidextrous fire selector
- Ambidextrous cocking handle, not reciprocating
- Ambidextrous bolt release
- Ambidextrous magazine release
- Ambidextrous buttstock adjustment lever
- Low recoil force - center of mass is in the middle of the rifle
- Captive takedown pins
- High quality impact resistant glass reinforced polymer
- Easy maintenance due to high level of user disassembly

# VHS-2

VHS-2 is a fully ambidextrous 5.56 NATO caliber assault rifle. Designed on bullpup modular platform it maintain all the ballistic benefits of a longer barrel in a shorter package without sacrificing overall length, accuracy and muzzle velocity. The polymer receiver is equipped with an 5 point adjustable buttstock. Combination of all of this with dual dust cover ejection ports on both sides of the receiver and specially designed empty case defectors create flexible and user friendly multi-purpose rifle. The rifle is equipped either with an carrying handle with NATO STANAG 4694 rail and flip up iron sights or with integrated 1.5X optical red dot sight. Front handguard has NATO STANAG 4694 rails at the 3, 6, and 9 o'clock positions with removable rail covers so the rifle can accept extra accessories. Magazines are made of durable polymer with semi transparent pattern and 30 rounds capacity allowing the operator to quickly view the ammunition count without removing the magazine. VHS-2 uses proved short-stroke gas piston operating system with rotating bolt. The rifle can fit VHS-BG 40 mm single shot grenade launcher under the barrel. VHS-2 is coming in two different versions: VHS-D2 500 mm barrel length designated marksman version with effective range up to 800 m and VHS-K2 410 mm barrel length standard base version.

## Advantages / key features

- compact size / short overall length
- accuracy
- ballistic benefits
- modularity
- true ambidextrality
- maneuverability
- highest operational versatility
- easy to operate in confined spaces
- easy maintenance
- no external moving parts on the weapon during firing (non reciprocating charging handle doesn't move and can't potentially hit users hands, face or hit structures and other objects during shooting in confined spaces such as vehicles, etc.)
- changing position of the ejection port without using special tools or spare parts
- left handed shooters can shoot with the right positioned ejection port or vice versa
- options between flat or magazine with coupling attachment points

# VHS-BG

The VHS-BG is double action single-shot 40x46 mm grenade launcher. Equipped with hammer forged barrel and high durable polymer, VHS-BG can fire all 40x46mm type of grenades on the market – smoke, HE, CS, Rubber, etc.

VHS-BG can be used as stand alone variant or as under-barrel grenade launcher for VHS-2 rifle. Mounting grenade launcher on VHS-2 rifle is easy and fast with our one pin quick-mount system.

VHS-BG has mechanical sight attached to the side of the launcher, either on the left or right depending of the users needs. It is also equipped with MIL-STD rail for mounting different sights options. With retractable stock, we can optimize overall length depending of the mission requirements.

Low recoil, light and compact, VHS-BG is ideal for different tasks.

# HS KUNA 9mm

KUNA is a lightweight, compact select-fire submachine gun, chambered in 9mm. Its ambidextrous design, non-reciprocating charging handle, and adjustable foldable stock ensure easy manipulation.

Versatile and customizable, it supports accessories like suppressors, lasers, and lights for specialized missions.

Built for professionals, it offers precision, maneuverability, and durability for the toughest operational environments.

Its monolithic aluminum upper provides a durable frame, housing a roller-delayed operating system that dramatically reduces felt recoil. KUNA comes with two 30-round magazines.
